Kinematic Analysis & AI Coaching Assessment

Patient / Subject ID	Anonymous (N/A)	Session Date	2026-05-03T17:12:22.056545
Total Duration	0.0 Minutes	Muscles Targeted	

1. Quantitative Metrics summary

0	0	0 / 100	0s
Exercises	Total Repetitions	Mean Tempo Score	Avg Sec / Rep

2. Kinematic Activity Timeline

3. Exercise Diagnostics

Exercise	Time	Sets x Reps	Tempo	Diagnostic Flags
----------	------	-------------	-------	------------------

4. Clinical Coaching & Prescription

✓ STRENGTHS ** • You logged a total_duration_min of **0.0**, meaning the day was completely free for recovery or new programming. • The session recorded **0** total_exercises, so you have a clean slate to design an optimal workout without any lingering fatigue. ** ↑ IMPROVEMENTS ** • Since **total_exercises = 0**, there was no stimulus for any muscle group; schedule at least **1** compound lift (e.g., squat) with **8-12** reps to create measurable load. • With an **avg_tempo_score** of 0.0**, there is no data on movement speed—focus on a controlled **2■2■2** tempo (2 s eccentric, 2 s pause, 2 s concentric) to generate a baseline tempo metric for future sessions. ** → NEXT SESSION

** Build on today's **0.0 min** baseline by targeting the lower■body and posterior chain with **3** sets of **8**-**10** reps of back squats, followed by **3** sets of **10** reps of Romanian deadlifts. Keep rest intervals at **90 seconds** between sets to promote both strength and hypertrophy cues. Aim for a total workout time of **30.0 minutes** to move from a zero■minute session to a meaningful training window. Pair the session with a protein■rich snack (≈ 20 g protein) within **45 minutes** post■workout to support recovery. ** ★ ** Even though today's log shows **0.0 minutes**, you've already cleared the schedule—use that fresh capacity to smash your next workout and make tangible progress toward your goals!
